March 10, 2020

To Our Residents and Family Members:

We know many of you may be concerned about the spread of the new coronavirus (COVID-19) being reported in the media and now how it impacts us at Rosedale Green and Emerald Trace. Earlier today, Kentucky Governor Beshear held a press conference and issued an executive order to long term care facilities limiting visitors to only those with loved ones that are receiving end of life care. The main reason for these recommendations/executive orders is to keep our vulnerable frail population as isolated from exposure as possible.

We understand connecting with family members is incredibly important and there are a variety of ways you might consider connecting with them. We are happy to assist you with connecting you with your loved one electronically via phone, computer, and social media. In the case where individuals have family members who are receiving end of life care, you will be contacted by a facility representative requesting your visit.

As a reminder, the facility has been and will continue to follow the recommendations of the CDC – Centers for Disease Control and Prevention, on proactive measures to reduce exposure, along with guidance and communication with the local and state health department.

Lastly, we have NOT had any reported cases of COVID-19 in our facilities and we will notify you if this changes. Should you have any questions, please feel free to contact the facility.

Further information and daily updates are available at the CDC coronavirus page at [www.coronavirus.gov](http://www.coronavirus.gov)

We appreciate your concern for your loved ones and your cooperation during this difficult time,

Londa Knollman, Executive Director
